PROFESSIONAL SUMMARY

As I near the completion of my studies, I am eager to transition into the professional world and apply my knowledge in a practical setting. I am committed to building a strong foundation for my career by continuously developing my skills and embracing new challenges. With both the time and determination to embark on my professional journey, I bring a proactive attitude and a passion for learning.

SKILLS

- C++, Python
- DevOps practices
- IT infrastructure
- Machine learning
- Network administration
- Problem-solving
- Cloud Development

EXPERIENCE

IT Consultant Private Client Consultancy - Malaga
07/2022 - 09/2023

- I worked as an IT Consultant for the summer, helping out the workers with their IT issues, partly creating a Desktop App for the company, setting up the company's 2FA, setting up antimalware, spyware and phishing rules, and generally maintaining the company's IT service
- Provided training sessions for end users on the use of newly implemented technologies or processes.
- This experience allowed me to strengthen my technical expertise and problem-solving skills while contributing to the organization's IT infrastructure and security.

EDUCATION

Bachelor's Degree: Computer Engineering Candidate
AGH University of Krakow - Erasmus - Krakow, Expected graduation 06/2025

Bachelor's Degree: Computer Engineering Candidate
University of Granada - Granada, Expected graduation 06/2025

CERTIFICATIONS

- AWS Academy Cloud Developing, Amazon Web Services (AWS), 11/01/24
- Machine Learning and Big Data for Bioinformatics, University of Granada, 01/01/24 - 06/30/24
- Master C++ Programming, Udemy, 27/12/2022
- Video game & Entrepreneurship Program, Incyde Foundation, 07/01/20

PROJECTS

Private Self-Hosted Google Drive Alternative
I developed and currently maintain a private, self-hosted alternative to Google Drive, designed for ease of deployment using Docker and Traefik. The project emphasizes simplicity and functionality while offering full control over data and security.

This ongoing initiative is part of a broader "homelab" setup that I plan to expand with additional services, allowing me to deepen my skills in networking, system administration, and cloud development.
